Breather Voice is an Inspiratory and Expiratory Respiratory Muscle Training (RMT) device. It provides a means to complete resistance strengthening for the muscles of respiration. Similar to the way lifting weights provides resistance strengthening for the muscles of your arms and legs. Respiratory muscle training (RMT) is a scientifically proven method to increase muscle strength and performance capacity of your respiratory system.

BEFORE YOU BEGIN

- Read the instructions found in the manufacturer’s package insert.
- If access to the internet is available, it’s recommended you watch the free training videos found at PNMedical.com/Voice including:
  * How to Use Breather Voice
  * Diaphragmatic Breathing
  * How to Clean Breather Voice
- Begin with the easiest settings by rotating both inhale and exhale dials so the #1 is aligned with the arrow at the top of the Breather Voice device. Note: inhale and exhale dials can be changed independently.
HOW TO USE BREATHER VOICE

- Sit upright and hold the mouthpiece between your lips, don’t clench it with your teeth.
- Breathe in and out through the mouthpiece (not the nose) using diaphragmatic breathing.
- Inhale effortfully 2-3 seconds, pause, exhale effortfully 2-3 seconds, pause. Repeat this rhythm to complete your set.
- Aim to complete RMT with effort in the zone (orange section of #6-8).

How to train IN THE ZONE: For optimal results when training with your Breather Voice, it's important to perform your Respiratory Muscle Training sessions with effort IN THE ZONE. The 6-8 range on the scale below correlates to 60%-80% of your maximum effort.

- Listen for a strong ‘wind’ sound for inhale and exhale to indicate you are doing RMT with effort IN THE ZONE.
- Listen to your body. Ask yourself:
  * Am I feeling out of breath or lightheaded?
  * Take breaks as you need them.
  *NOTE: Lightheadedness that quickly goes away may occur when you first begin training. This is a normal response to the forced inhale/exhale maneuver. Take a short break as this should resolve quickly and you can get back to complete your RMT set.
- Please use Breather Voice to complete RMT 6 days per week, twice a day. One session any time in the AM hours and one session anytime in the PM hours. Aim for 3 sets of 10 full breaths at each session. Leave a good 1-2 minute or more break in between sets.
- Once 10 breaths per set becomes easy, try increasing the resistance by increasing either/both inhale and exhale dials. If you stop using your Breather for a period, you may find the need to reduce the resistances to get back to RMT.
- A recovery day from RMT following performance or strenuous rehearsals is recommended.
- You should start noticing positive benefits after a week or two of use. We recommend you continue RMT for the rest of your life.
CLEANING BREATHER VOICE
Up to once weekly

1. Separate the mouthpiece from the white portion of Breather Voice.
2. Wash in warm water with mild dish-washing soap.
3. Rinse both pieces well.
4. Shake out the excess water & use a clean towel to dry surfaces.
5. Air dry thoroughly (overnight is a great time).
6. Before putting the mouthpiece on, sharply inhale & exhale through the body to release any possible seals.
7. Store in a clean, dry place that can ventilate.
*Do NOT put Breather Voice in the dishwasher. The high heat may affect the way it works or ruin it completely.

DISINFECTING BREATHER VOICE
Up to once weekly

1. Clean Breather Voice as outlined above in steps 1-3.
2. Soak in either 70% alcohol OR hydrogen peroxide for 5 minutes.
3. Rinse with sterile or distilled water.
4. Shake out excess water & allow to dry thoroughly.
5. Store in a clean, dry place that can ventilate.

*NOTE: Breather Voice is a device to be used by one person. It should not be shared with others. All cleaning recommendations assume The Breather is being used by a single individual.
